

W. N. T. C.

This is the seventh and perhaps most successful year since W.N.T.C. started operating on our campus. The campus radio station is an independent, self-supporting organization which draws its personnel, totaling seventy-five, from both Clarkson and SUNY-B.P. Its purpose is to bring as far entertainment as possible to its student listening audience.

A most popular feature with the students has been the station's policy of broadcasting as many athletic contests as possible. Supplemented this year by a new and more powerful transmitter, W.N.T.C. expects to improve the technique and quality of its productions for its ever increasing listening radio audience. In addition, the new transmitter is expected to enable the station to sponsor more student dramatic productions than ever before.

Operating of the radio station requires a large staff of technicians and others proficient in programming, engineering, publicity, and business, which gives the organization the opportunity of bringing together men of different departments and to promote fellowship and mutual respect.

Billy Straker
Station Manager
